EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jennifer Hayes on 05/08/06.

The application has been amended as follows:

- Cancel claims 1-4, 7-8, 10-11, 14, and 17

The following is an examiner's statement of reasons for allowance: In light of the applicant's amendments to the claims, the following species election requirement is necessary:

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

- Species I directed to an inkjet recording medium wherein the ink is a colorless ink that does not contain a coloring agent and has substantially no absorption in a visible light region (as applied to claims 1-4, 7-8, 10-11, 14, and 17 in their current forms)
- Species II directed to an inkjet recording method wherein the acid precursor is a compound comprising an atom which changes to a hard acid by the chemical reaction or an atomic group which changes to a hard acid by the chemical

reaction, and the compound which reacts with the acid precursor to release an acid is a compound comprising a nucleophilic group (as applied to claims 9, 12-13, 15-16, and 18-19 in their current forms)

The species are independent or distinct because they are directed to unrelated inventions. One species is directed to colorless ink, while the other species is directed to a compound comprising a nucleophilic group which reacts with an acid precursor.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The applicant has elected species II. However, because independent claim 9 of species II is allowable (as discussed in the previous rejection), the applicant has agreed to cancel the claims pertinent to species I. The claims pertinent to species II, that is, claims 9, 12-13, 15, 16, and 18-19, are herein allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
